

got-1

```
## Quarto kennenlernen Import data and Map it. Man kann Figures referenzieren mit @fig_scatter

## Daten & Plot

library(readr)
library(ggplot2)
library(dplyr)
library(ggrepel)

screentimes <- read_csv("GOT_screentimes_1.csv")

screentimes_high <- top_n(screentimes, 10, screentime)
```

Figure:

```
ggplot(screentimes, aes(screentime, episodes)) +
  geom_point() +
  geom_text_repel(
    data = screentimes_high,
    aes(label = name),
    min.segment.length = 0
  )
```

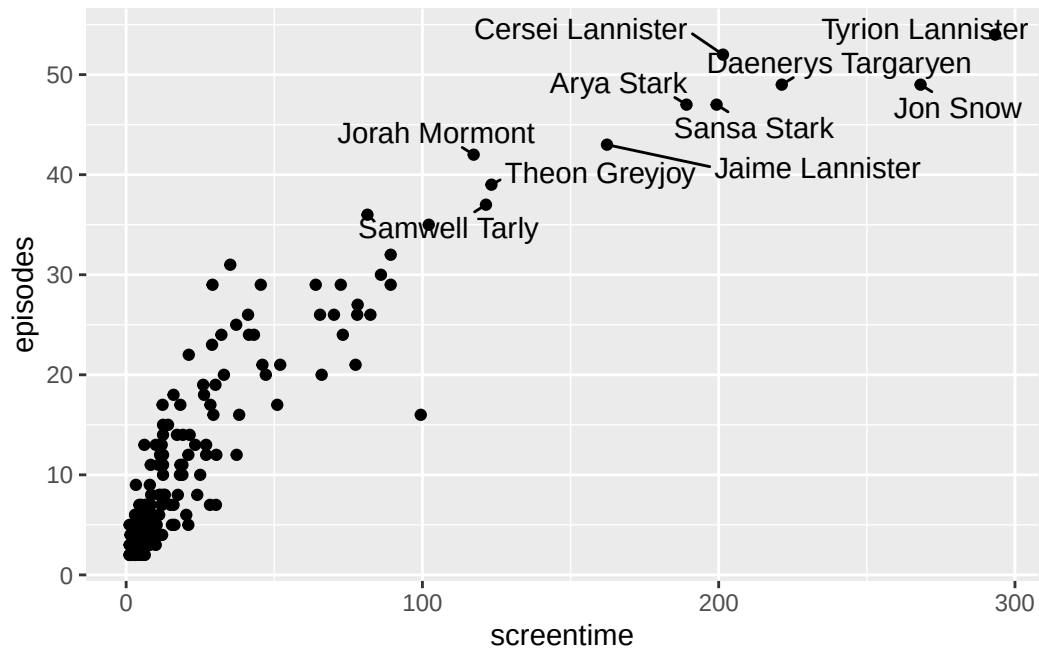

Figure 1: Screentime vs Episodes in Game of Thrones

Wie in @fig_scatterplot gezeigt, haben einige Charaktere deutlich mehr Screentime als andere.
